Professional summary

I'm a self-taught web development student. I've learned my skills through various websites, taking free courses, researching, and watching videos. I have two years of experience as a developer and knowledge of technologies and tools such as JavaScript, TypeScript, HTML, CSS, ReactJS, NodeJS, Tailwind, Git, REST APIs, and design in Figma.

I'm passionate about exploring new things and strive to offer creative and efficient solutions to the challenges I encounter. I'm always looking for opportunities to expand my knowledge and skills.

I enjoy working in teams, as I believe sharing ideas helps improve the development process and also leads to greater creativity and efficiency in problem-solving.

Professional experience

Projects

I have completed projects that have allowed me to improve my skills as a programmer, both in design and logic.

Ecommerce: Built with ReactJS and TypeScript, you can add and/or remove products from your cart, and you can also simulate purchasing them. [See more](#)

Copy Deezer: Built with vanilla JavaScript, HTML, and CSS. This is a copy of the Deezer website. [See more](#)

Education

Platzi: JavaScript from scratch.

Desafío latam: UX/UI design and Figma.

Free code camp: Responsive web design.

Microsoft: Essential programming fundamentals.

Scrimba: React js.

Digital House: Web designer.

Skills

- Optimized code clarity and readability.
- Pages with API implementation.
- UX/UI design in Figma, providing a good user experience.
- Use of components for code reuse.
- Implementation of responsive design.

Soft skills

- Adaptability..
- Continuous learning.
- Problem-solving skills.
- Collaboration..

IDIOMAS

Español: Native.

Inglés: Intermediate.
